

caProteo Use Case 1

Low Granularity,
Single Site View

caProteo Use Case 2

Low Granularity,
Peer-to-Peer View

Peer-to-peer data sharing:

Data key =
Unique Identifier
for all data and meta-data
Associated with a study

Site A sends Site B a **data key**
Site B can access a **'study'**

'Study' = all de-identified
data and metadata identified by
Site A as a coherent whole.

Development Priorities

- Develop for SELDI/MALDI data, prepare to develop for other data sources
- Identify SELDI/MALDI data elements currently *in use*
- Develop all **three** components in parallel
